Table of Contents

Online Processing Detail Record

Position	Length	Data Type	Field Name	Comments
1	1	A	Record Type	Constant "P"
2,3	2	N	Format Constant	Constant "74"
4	1	A	Format Constant	Constant "V"
5-76	*No Modifications*			
77	1	A	Transaction Type	**Notes**: For International Maestro, if the Transaction Type does not equal 2, 5, 6, or 7, the transaction rejects with Response Reason Code 253 (Invalid Transaction Type). However, if Transaction Type = 2, a static AAV must be sent or the transaction rejects with Response Reason Code 253 (Invalid Transaction Type).
78,84	*No Modifications*			

UK Domestic Maestro Format Indicator (SW)

Length	Data Type	Field Name	Comments
2	A	Format Indicator	"SW" Constant – UK Domestic Maestro card information. Specifies this record as an additional processing format of the Chase Paymentech standard format.
4	A	Card Start Date	The date the card becomes active. (Optional) MMYY format **Notes:** This field should be submitted when the card does not have an issue number. If the card displays ONLY a start date and no issue number, the Card Start Date should contain a value and the Card Issue Number field must be blank. If the card displays both a start date and an issue number, the Card Start Date should be left blank and the Card Issue Number field must be populated. If both are sent, the Card Start Date is ignored. This field is no longer used by UK Domestic Maestro Issuers.
2	A	Card Issue Number	An incremental counter of either one or two characters defined by the Issuer. (Optional) Right justified/blank filled **Notes:** If a card is lost, the Issuer provides a replacement card with the issue number being increased by one. The Card Issue Number must be populated even when a start date exists. In addition, the Card Issue Number must be populated exactly as shown on the card. **Example:** If the card displays "01", populate "01", NOT "1". If the card displays "1", populate "1". This field is no longer used by UK Domestic Maestro Issuers.

UK Domestic Maestro Format Indicator (SW), (Continued)

Note: This Format Indicator can be sent when MOP= SW.

This sample indicates only card start date displayed on the card.

Sample

```
8 9
56789012
SW0303
```
